

Naviance: Family Connection

Family Connection gives students and families one destination for all things post-secondary. This is private information that can only be accessed by the student, parents or the counseling department. MSJ students are registered and trained on the Naviance Family Connection for access to their personal site. The college data in Family Connection allows a student to search for the right individual college matches. Family Connection can also be used to:

- Store a personal game plan
- Research and create lists of possible careers and majors
- Build a resume
- Conduct personality and career assessments
- Create a list of colleges a student is considering
- Create a list of colleges to which he/she is applying
- Track college application tasks such as deadlines and mailings
- View application results
- View anonymous college admissions data from past MSJ graduates displayed visually as a scattergram
- Scholarship database

Family Connection is accessed by our counseling department to keep track of MSJ student data such as GPA's, standardized test scores, college choices, college application information, and personality and career assessment results. Students can also be contacted by e-mail about college visits, deadlines, surveys, and other pertinent college information from the counseling department.

To access the Family Connection student site, a student must have been registered during a computer lab Naviance training lesson or by their guidance counselor. The student can then log onto: <https://connection.naviance.com/fc/signin.php?hsid=msjhs> using their user name and password.
